Summary

I'm a Frontend Developer with 1 years of experience specializing in React. I build dynamic, user-friendly interfaces using JavaScript, HTML, CSS, and modern frameworks. I have experience integrating APIs and working with backend services to create efficient and scalable applications. I thrive in agile teams and enjoy solving complex problems.

I completed the Frontend Development (React) course at iTech Academy, gaining hands-on experience with React, JavaScript, and modern web technologies. Worked on real-world projects, built responsive applications, and learned best practices in state management and API integration.

Experience

Front-end teacher, iTech

Jan 2024 – Apr 2024

- Assisted in teaching frontend development, mentoring students, and providing guidance on JavaScript, React, and web development best practices. Helped learners debug code, improve problem-solving skills, and understand modern development workflows. Contributed to practical sessions, ensuring students gained hands-on experience in building responsive web applications.

Front-end developer, inSoft

Jun 2024 – Aug 2024

- Gained hands-on experience developing web applications for medical clinics and an online learning platform. Worked on API integration, UI development, and performance optimization while collaborating in an agile team environment. Additionally, contributed to improving user experience, implementing responsive design, and optimizing application performance for better scalability and efficiency.

Front-end developer, Limsa

Dec 2024 – Present

- Utilized **React.js** to build modular and scalable UI components, ensuring maintainability and performance.
- Implemented **Redux Toolkit** for state management, optimizing data flow and user interactions across the platform.
- Integrated **REST APIs** using Axios, improving data fetching efficiency and overall application performance.
- Worked on admin dashboards, enabling seamless content management and moderation functionalities.
- Developed and optimized custom UI components for interactive and visually appealing web applications.
- Gained hands-on experience in team collaboration, working alongside designers and backend developers to deliver production-ready solutions.

Education:

Namangan State Technical University:

Sep 2023 – Jun 2028

Pursuing a degree in Information Systems and Technologies at Namangan State University of Technology, focusing on software development, database management, and system analysis.

iTech Academy:

Successfully completed the Frontend Development (React) course at iTech Academy, gaining hands-on experience with React, JavaScript, and modern web technologies. Developed responsive web applications, worked on real-world projects, and learned best practices in frontend development, including state management, API integration, and performance optimization.

Skills

React, Vite, HTML5, CSS3, SCSS, TailwindCSS, Flowbite, MantineUI, AntDesign, Trello, Redux (Redux toolkit) Git, Github, Gitlab, Zuustand
